EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

Washington State University (expected graduation: May 2026)

EXPERIENCE

Software Engineer Intern - Schweitzer Engineering Laboratories - Apr 2025 – Present

- Utilizing **React-TS**, **Golang**, and testing frameworks such as **Playwright** and **Vitest** to build scalable and performant enterprise-grade applications.
- Implemented a **Jenkins** artifact using **Shell** scripts, **Node.js**, and **JavaScript** that aggregates SEL device data into a static **HTML/CSS** web page for faster data retrieval.

Research Aid 2 - Washington State University - Oct 2024 – Present

- Developing a **GIS**-based watershed analytics web application, designed to visualize and analyze hydrologic and environmental data across Washington and Oregon, supported by a NASA-funded initiative.
 - Implementing the core functionality of the web application UI with **React-TS**, **Leaflet**, and **Django** to support interactive mapping features for real-time exploration of geospatial datasets.
-

RELEVANT PROJECTS

Bite - Nov 2024 – Present

- Developing a cross platform mobile application using **Flutter**, **SQLite**, and **Firestore** that aims to help users save their favorite recipes, track expiring food items, and track user spending.
- Designed an intuitive UI with **Figma** to streamline recipe saving and food tracking, ensuring seamless user experience.

Pulse (<https://github.com/jakevanhalder/Pulse>) - May – June 2024

- Utilized **C#**, **ASP.NET**, and **Bootstrap** to create a todo, goals, and budget web application.
 - Integrated a secure authorization and authentication system using **Identity Entity Framework** and utilized **SQL** for the back-end, ensuring robust user access control and data privacy.
-

TECHNICAL SKILLS

- **Languages:** Typescript, JavaScript, Golang, C/C++ & C#, Python, Flutter, Kotlin, Jetpack Compose
 - **Frameworks & Tools:** React, Vite, .NET, Jenkins, Playwright, Vitest, Git, Linux, Figma
-
